

Day 23: Editing Challenge: Animate a Part of your Photo

For this project you can use a photo you already took. Look for beach shots with waves that you can animate. Or waterfalls, rivers or lakes. You can also use trees in the background that can move. Or a part of a shirt that you build into a GIF.

You can also explore the app called [Unsplash](#) for stock images. Type in "water" and you will find a bunch of images you can use.

Do any of the necessary edits and then start the tutorial. **You will do this to three photos.** Try it with 2 of your photos and 1 from [Unsplash](#) or use all your own photos.

Watch this video: [How to Animate photos with your Phone](#)

Upload your 3 animated photos here to Google Classroom for a grade:
