

Day 3: Googly Eyes.

Draw and cut some Googly Eyes from white paper. I want the eyes to be cut out all around the black edge and the tape needs to be hidden behind the eyes so you cannot see the tape. Take a walk around your house or neighborhood. Take at least 15 images that give personality to different, non-living things. Can you find life-like qualities on signs, pipes, chairs, walls, etc.?

You will bring all your images into your in house camera app, and narrow it down to your best 6 photos and edit them. With your **6 EDITED** images, you will create a COLLAGE in [PicCollage](#). Turn in your [PicCollage](#) image
