

Diptychs

Updated

Dptych

A diptych is a photograph that uses two different side by side to form one single artistic statement or a strong relationship between the two subjects.

Student Examples

Assignment

Create a Diptych or Triptych in which images must interact with each other in a way that makes them say something more than if they were alone.

Only show same object if substantially changed

Do NOT just take two angles of the same thing and use it as a diptych
