

Dodecahedron Building Steps

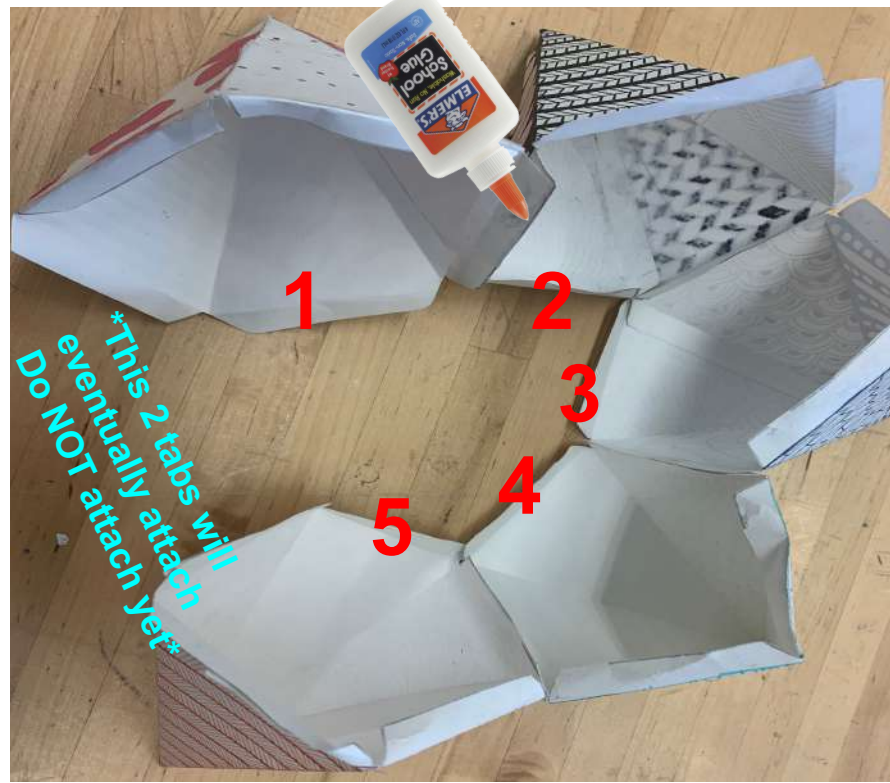

Step 1: You will need 5 of your Pyramids

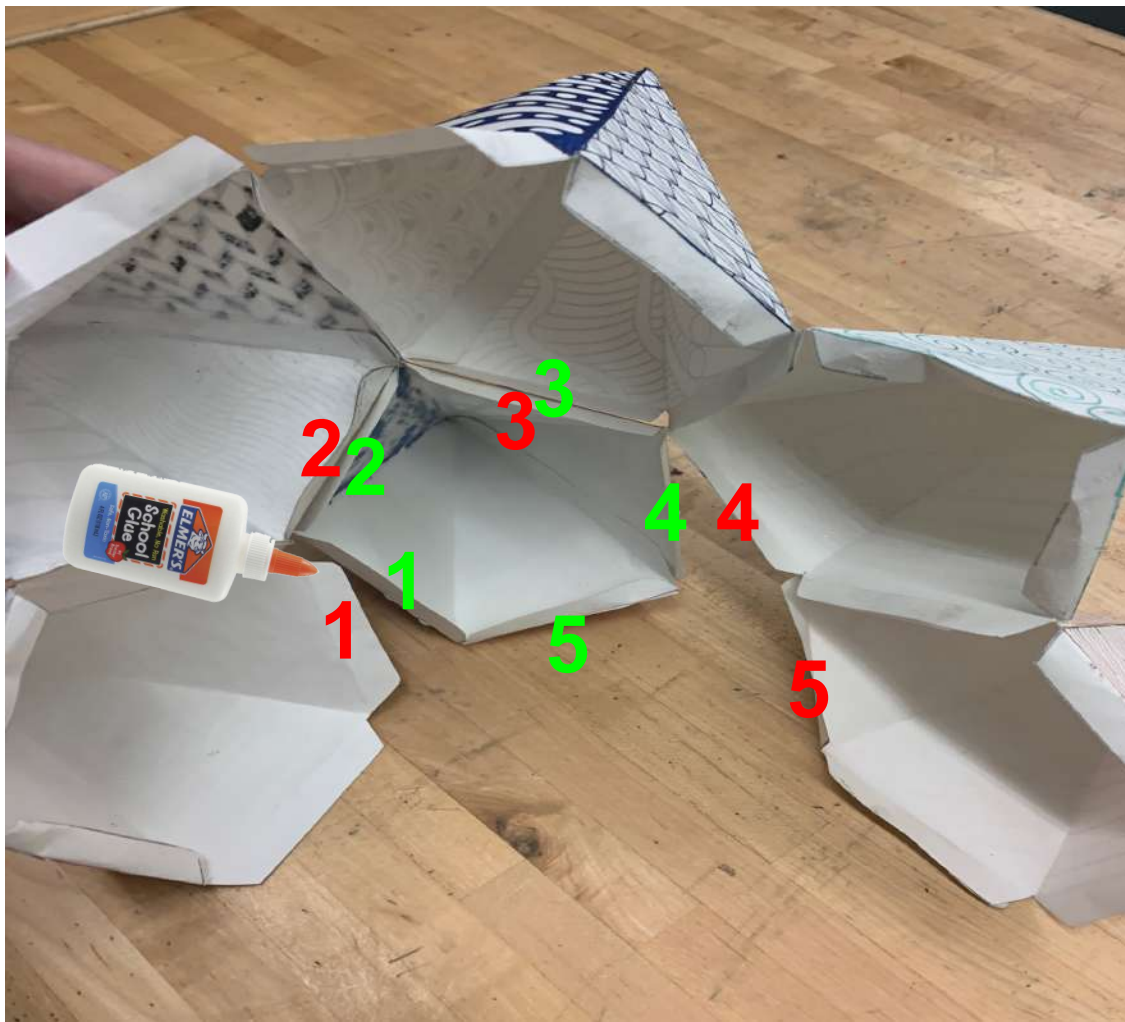

Step 2: Attach 2 pyramids together using white glue or glue stick and hold it for 3 minutes minutes to make sure it is secure

Step 3: Repeat step 2 until you have a string of 5 attached pyramids

Step 4: Place the string of 5 pyramids down with only the 5 side tabs on the bottom center. * see image above.

Step 5: Take a 6th pyramid and attach the 5 tabs to the string of 5 pyramids using a white glue or a glue stick.

*****Remember to hold each glued tabs for 2 to 3 minutes until secured***

Step 5 will look like
this in the inside

Step 5 will look like
this in the outside

Step 5 will look like this in the inside, once it is popped out

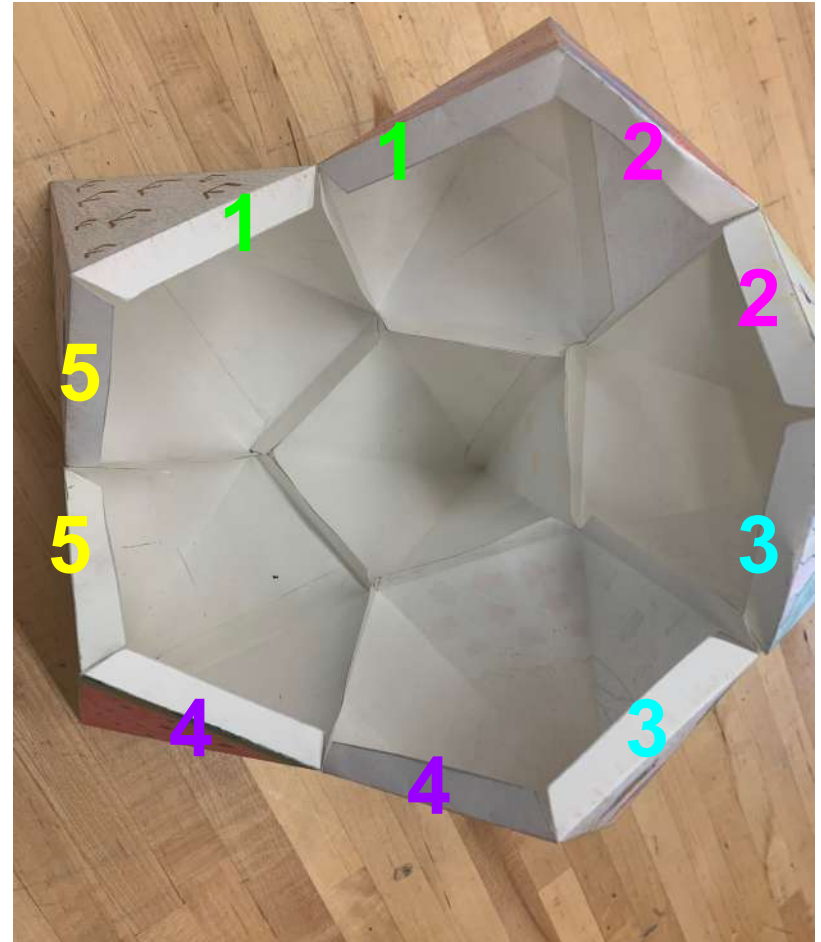

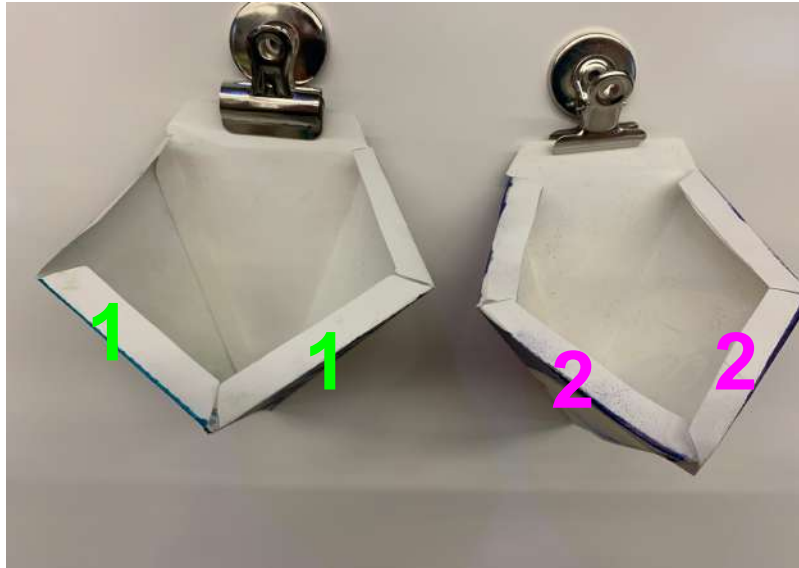

Step 5 will look like this in the outside, once it is popped out

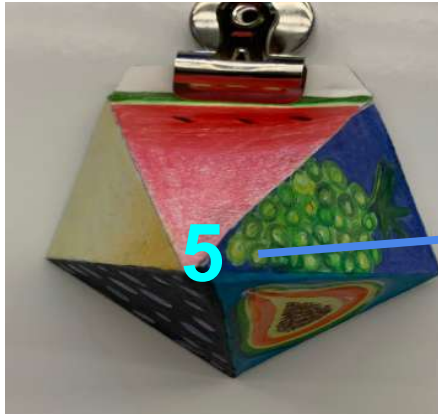

Step 6: You will add 5 more pyramids by attaching 2 tabs of the new pyramid to 2 tabs between the upper 5 pyramids already attached

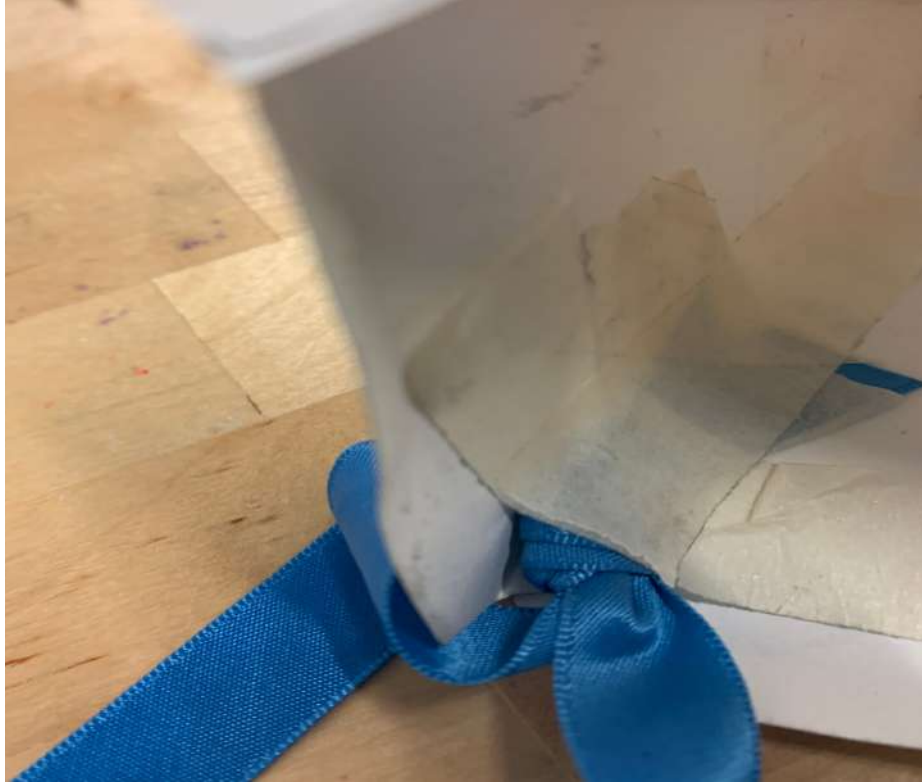

*Seeimage

This is what Step 6 will look like when you have 4 pyramids glued to your first 6. You now just need to add the 5th pyramid to the last spot

Step 7: Add string, yarn, or to the inside before adding the last pyramid

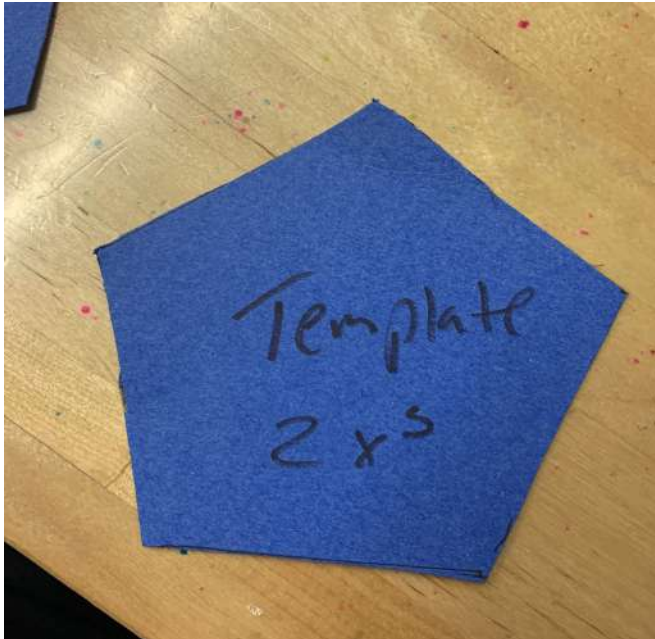

Step 8: Cut out 2 templates on scrap color paper

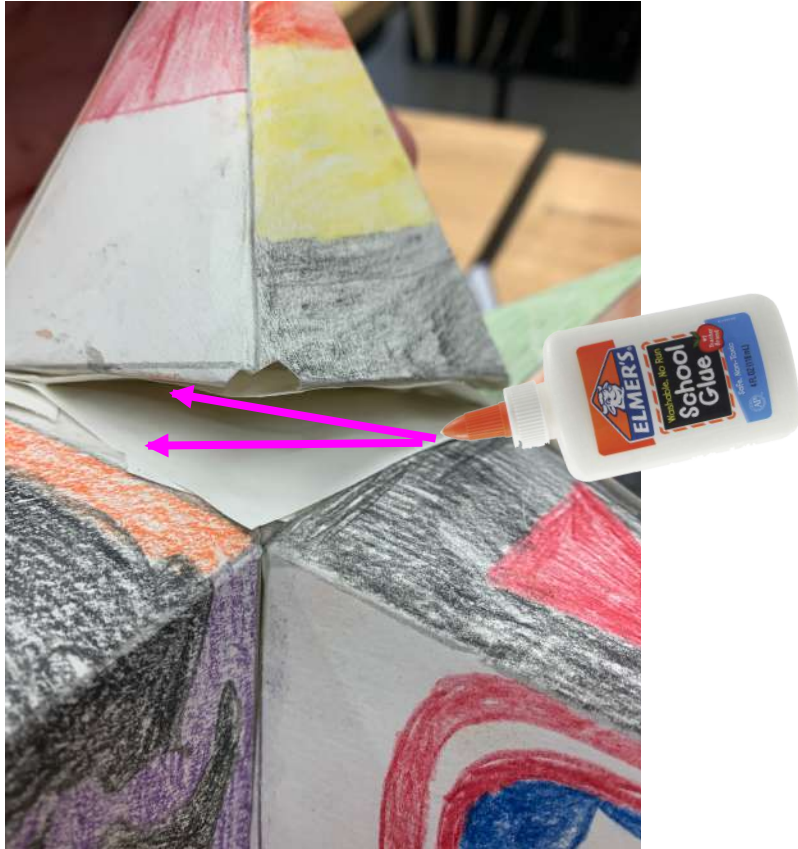

Using white glue attach to the tabs of the bottom of last pyramid

Using white glue attach to the tabs of the combined pyramid

Let glue dry really well

Step 9: Using white glue attach last pyramid to the group of pyramids

Alternative Step 8:

Prepare your dodecahedron for its last pyramid by pulling the last tabs out flat.

Step 8: Add white glue to each tab

Alternative Step 9:
Add your final Pyramid
to the 5 tabs you just
added white glue to.
