

We thought you should know...

There are several new psychoactive drugs on the market and these products are being sold in Union County.

The Cannabis industry has learned how to make Hemp products that have some of the same properties as marijuana. These new products are chemically very similar to THC and do produce a high, and other psychoactive effects.

They are called Delta 8 THC, Delta 10 THC or THC 0. Also, D8, D10...

These chemicals are infused in a variety of products: Vapes, gummies, seltzer, syrup, oils, slushies, and blunts. At this point they are legal in Ohio. To learn more about these products contact Nancy at the Union County Drug-Free Coalition Nancy@mhrbuc.org or Dept Rich Crabtree with the Union County Sheriff's Office. rcrabtree@unioncountyohio.gov
