Rationale:

The necessity of clear, concise writing integrated with technology is constantly growing in importance. The assignments in this class are designed to give the students experience in different types of writing and communication, sharpen proofreading abilities, practice spelling, and improve grammar skills.

Textbook:

Students will be given a textbook within the first few weeks of school. They will be expected to cover it to protect it.

Course Objectives:

At the end of this year, students will be able to use correctly the eight parts of speech, demonstrate understanding through writing, and revise their own papers in regards to the six writing traits. They will also be able to prepare and give a speech with an appropriate introduction and conclusion, maintaining the topic throughout.

Assessments:

Throughout the year, students' understanding will be assessed in a variety of ways including: tests, quizzes, written assignments, speeches, spelling tests, and projects. The assessments will be utilized to both form instruction and rate understanding. Rubrics will be utilized to grade performance assignments such as essays, speeches, and projects. Students will also be assessed on participation in journal writing.
