# Emmett Chappelle

- Born in Phoenix, Oct.24, 1925

Lived on a small farm with both of his parents

He had no siblings; he was an only child.

He went to Phoenix Union Colored High School and graduated with honors!

Soon after he graduated, he was drafted to the U.S army

He then went through many years of college.

## \* Childhood of Emmett Chappelle

\* He got married to Lonnie.

\* He never had any kids.

Family Life ! 😊

Emmett's invention was  
the detection of  
Adenosine Triphosphate  
and Bioluminescence. He  
also got 14 U.S. patents.

\*His inventions  
and  
Accomplishments.

## First job

- After college, he worked as an instructor at Meharry Medical College in Nashville, Tennessee for three years.

## Most important job

- Chappelle joined NASA as a part of the Goddard Space flight center. He retired in 2001.

\* Job History 😊

## Cool Army Facts

- While in the Army, Chappelle was reassigned to the all black 92<sup>nd</sup> infantry division and served in Italy.

## About his inventions

- Although you may not see them, they are found in every day life.

Interesting

Facts?

\*Interesting Facts!

We can relate  
because ...

- We both try our best and work our hardest at everything we do.

Also we both  
had/have life goals at  
an early age.

\*How We Relate!

He is worthy of acknowledgement because.....

- His inventions are very important to science and are found in every day life.

He reminds me of...

- My parents because they work hard and give everything their all no matter what it takes.

**\*Worthy of  
Acknowledgement**

\* In conclusion, I learned a lot during this project. I learned to never give up on your dreams. I also learned to put hard work into everything you do and you will succeed. Finally, I learned there are inventions all around that you don't notice; and once you do, it is awesome knowing something most do not know.
