END OF YEAR CHALLENGE ACTIVITIES

Find/research a **commercial**. Recreate it using the same shots, audio, and props. Edit it the same way as well! I would do a 30-second commercial.

Using **Illustrator**, do the following tutorial:
https://design.tutsplus.com/tutorials/how-to-create-and-transform-kawaii-animals-in-adobe-illustrator--cms-27057

Using **Canva**, create the following: calendar of the year or summer events

Try recreating a funny video you might've found on Vine or Tik Tok using **PowerDirector**, or a video editing app you feel comfortable with. (Keep it fun, but clean!)

Create a poster of your favorite band or singer using Photoshop or **Canva**. Add text to it as though there is a concert coming up soon! Location. Time. Date.

Record your pets doing 3 different activities, then do a voiceover of their internal monologue in a fun voice. Use **whatever** video editing software you'd like.

Using InShot, create a Top 5/10 "WatchMojo" style list. A tutorial will be provided!

Walk around your house or in school and randomly interview people to get their reactions. You can use questions like: What's your favorite Delphi restaurant? or What's 7 x 9? Who's your favorite teacher? Why? What's the best thing to eat in our cafeteria. But make sure the questions are asked as fast as possible for the best reaction.

Create a Midi Chiptune using Chrome Music Lab.
(Chiptune - Style of synthesized electronic music made using the programmable sound generator)
(Midi - Musical Instrument Digital Interface)
Here is an example:
https://musiclab.chromeexperiments.com/Song-Maker/song/5640713859497984

"Billy On The Street" type interviews, using a microphone from a vlogging kit, make it as funny as possible.

Stop Motion Animation - if you don't know how to do this, learn it!

Ted Talk - Is there a topic you are passionate about? Create a TED Talk and video yourself wherever you want...your swing on your porch, your desk, your kitchen table, while walking in the woods...

Vlog - Using our Vlogging kits, you can create a (video log) about what's going on. Kind of a video podcast!

Audacity -

Animation - using an animation software program of choice, learn how to continue learning to animate.

Cell Phone Photography -
