

Skyward Family & Student Access

Here at Western, we use Skyward for our Student Management System. As a parent, you will be given access to your students' grades, calendar & schedule via Skyward Family Access. Skyward's Family Access is based upon households and you will need to review our data after registration and make sure that we have correct family data. Once our registration data is verified we will notify you by email or other notification with your Family Access Login information. If you have any questions or do not know your login information, please contact the office secretary in the building where your student is attending.

Here are some of the features and benefits that our new Family Access will provide:

Parents/guardians will see all of their students under a single login

- Students will be provided individual logins to access their information
- Parents will be able to view grades, assignments, attendance, report cards, and activity calendars
- Parents will be able to subscribe to automatic email notifications for progress reports, grade, and attendance information
- Family Access will also be available on mobile devices

Please watch for information about Family Access in your email and other school notifications. We anticipate launching Family Access as soon as we verify family data and complete our teacher training.
