

School Closure Lesson Plans

Forensic Science/DeBoer – Week 2

Day 1

Do the assignment in your text on page 128: Writing in Science.

- Interview an adult family member or friend who has received a notice to report for jury duty. Ask the person to describe what happened when he or she arrived at the courthouse. If the person was selected to serve on a jury, ask questions about what happened in the courtroom and the jury room.
- Write a brief paper summarizing what you learned.

Day 2

- Read page 78 in the text.
- Answer the questions on page 79, “Reviewing Key Concepts”
- Create a fingerprint using the instructions on page 74, “Discover Activity”. You can use either washable marker or graphite from a pencil (scribble a pencil on a piece of paper, roll your finger in the graphite and then roll the same finger on an index card or another piece of paper). Use the pictures on pg. 75 and identify a loop, whorl, and arch on your fingerprint.
