

Formal Portrait Treasure Hunt

Using the following two links, find 5 examples of portraits where you see at least half the body from the waist up (full is better) where they are in the middle of the frame and **looking at the viewer**, and insert them into this google slide. Pick really good ones that impact you as a viewer.

They do NOT have to be photographs! They could be paintings, prints, etc

They do need to be by 5 different artists. Make sure you include the info about the work on the slide.

YOU MUST INCLUDE AN EXPLANATION OF WHY/HOW IT IMPACTS YOU

EXAMPLE

Arrangement in Flesh Colour and Black: Portrait of Theodore Duret

Artist:

James McNeill Whistler (American, Lowell, Massachusetts 1834–1903 London)

This image impacts me because the use of monochromatic colors makes the lady's fan that he is holding pop out and grab my attention. Then I realize he is holding a woman's coat and combined with the sad haunted look on his face, it makes me wonder what the story is behind the image. Did she run away with someone else? Or is he just holding her stuff while she visits the restroom?
