Drug Free Workplace

It is the policy of the board of education to provide a drug-free workplace and to work toward a drug-free society. It is the goal of the district to prevent the illicit use of controlled substances and alcohol.

The unlawful manufacture, or the distribution, dispensing, use, possession, or being under the influence of controlled substances and/or alcohol by any employee during the work day, at any school activity, or while in the performance of his/her employment by the district wherever located, is absolutely prohibited. Drug Abuse by Students

Philosophy

The Huron public school district #2-2 recognizes that chemical abuse/dependency is a concern that needs to be addressed by the school and the community. Chemical dependency problems often interfere with school behavior, student learning, and the fullest possible development of each student.

The use or possession of alcoholic beverages or any controlled substance, as defined by South Dakota Codified Laws (SDCL), by any student on any school property or while attending any school related function is prohibited. No student shall be intoxicated, use, sell, distribute, buy, receive, be under the influence of, or in the possession of a controlled substance as defined by SDCL. Students who use prescription drugs authorized by a licensed physician do not violate this administrative procedure if the students conform to the prescription and appropriate school policies.

The Huron public school district is committed to the development and the implementation of programs and policies which contribute to the well-being of students through prevention, intervention, after-care, and staff development. The major components of our approach to chemical abuse are defined as follows:

1. **Prevention**

An educational process that promotes the development of a healthy self-attitude and provides individuals with information and inter-actions needed to make responsible decisions regarding chemical use.

2. **Intervention**

An established process in which caring persons confront an individual with data regarding his/her chemically-related behaviors in an effort to encourage that individual to seek appropriate corrective measures.

3. **After-care**

Information on community support systems, individual counseling through school counselors as deemed necessary by the student, parents, administration, and chemical health facility.

4. **Staff Development**

A process through which individuals acquire the knowledge and skills required to constructively respond the problems of chemical abuse.

A biennial review of this policy will be conducted to insure that current and effective measures are being taken to meet the needs of the students.
