

Draw and circle to show how you made 10 to help you solve the problem. Complete the number sentences.

1. There are 4 marbles on the left side of the table and 9 on the right side. How many total marbles are on the table?

9 and _____ make _____.

10 and _____ make _____. There are _____ marbles in all.

2. Jack has 6 cars and Sam has 9. How many cars do they have altogether?

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Jack and Sam have _____ cars.

$$10 + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Change the picture to make ten. Write the easier number sentence and solve.

3.

$$9 + 3$$

$$10 + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

4.

$$4 + 9$$

$$10 + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Solve. Make a math drawing using the 10-frame to show how you made a 10 to solve.

5. $9 + 5 = \underline{\hspace{2cm}}$

$$10 + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

6. $9 + 6 = \underline{\hspace{2cm}}$

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Solve. Use a number bond to show how you made a 10. Then write the 10+ fact to go with it.

7. $4 + 9 = \underline{\hspace{2cm}}$

8. $9 + 6 = \underline{\hspace{2cm}}$

$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$

Complete the addition sentences and number bonds.

9. $10 + 5 = \underline{\hspace{2cm}}$

10. $6 + 9 = \underline{\hspace{2cm}}$

Solve and match the number sentence to the 10+ number bond.

11. $9 + 8 = \underline{\hspace{2cm}}$

12. $9 + 4 = \underline{\hspace{2cm}}$

13. $3 + 9 = \underline{\hspace{2cm}}$
