

WGSD Curriculum – Math 1st Grade

In Grade 1, instructional time will focus on four critical areas: (1) developing understanding of addition, subtraction, and strategies for addition and subtraction within 20; (2) developing understanding of whole number relationships and place value, including grouping in tens and ones; (3) developing understanding of linear measurement and measuring lengths as iterating length units and (4) reasoning about attributes of and composing and decomposing geometric shapes.

While the content learning goals describe the mathematics students should be able to understand and do, the first eight learning goals (The Standards for Mathematical Practice) describe how students should engage with these mathematical concepts and skills as they grow in mathematical maturity and expertise. Teachers will connect the mathematical practices to mathematical content in all mathematics instruction. These learning goals merit the most time, resources, innovation, and focus necessary to qualitatively improve the instruction, assessment, and student achievement in mathematics.

WGSD Curriculum – Math 1st Grade

| | |
|--|----|
| Students will be able to make sense of problems and persevere in solving them. | 3 |
| Students will be able to reason abstractly and quantitatively. | 5 |
| Students will be able to construct viable arguments and critique the reasoning of others. | 6 |
| Students will be able to model with mathematics. | 7 |
| Students will be able to use appropriate tools strategically. | 8 |
| Students will be able to attend to precision. | 9 |
| Students will be able to look for and make use of structure. | 10 |
| Students will be able to look for and express regularity in repeated reasoning. | 11 |
| Students will be able to represent and solve problems involving addition and subtraction. | 12 |
| Students will understand and apply properties of operations and the relationship between addition and subtraction. | 13 |
| Students will be able to add and subtract within 20. | 14 |
| Students will be able to work with addition and subtraction equations. | 15 |
| Students will be able to extend the counting sequence. | 16 |
| Students will understand place value. | 17 |
| Students will be able to use place value understanding and properties of operations to add and subtract. | 19 |
| Students will be able to measure lengths indirectly and by iterating length units. | 20 |
| Students will be able to work with time and money. | 21 |
| Students will be able to reason with shapes and their attributes. | 22 |
| Students will be able to represent and interpret data. | 24 |

WGSD Curriculum – Math 1st Grade

Number Sense & Operations in Base Ten

High Priority Standards

1.NBT.A.1 Understand that 10 can be thought of as a bundle of 10 ones – called a “ten”.

1.NBT.A.2 Understand two-digit numbers are composed of ten(s) and one(s).

1.NBT.A.3 Compare two two-digit numbers using the symbols $>$, $=$ or

1.NBT.A.4 Count by 10s to 120 starting at any number.

Learning Goal

Students will understand place value.

Proficiency Scale

Innovating: Student demonstrates an in-depth inference or advanced application, or innovates with the learning goal.

Meeting: Student demonstrates mastery with the learning goal as evidenced by:

- Comparing and ordering two-digit numbers based on the meaning of the tens and ones using $<$, $>$, or $=$.
- Decomposing two-digit numbers in groups of tens and ones.

Approaching: Student demonstrates they are nearing the learning goal by:

- Recognizing and recalling specific vocabulary, such as: amount, compare, digit, less, more, number, ones, tens, order.
- Performing processes such as:
 - Recognizing symbols such as $<$, $>$, and $=$.
 - Representing the two digits of a two-digit number as amounts of tens and ones.
 - Counting by 10s to 120 starting at any number.

Beginning: Student demonstrates a limited understanding or skill with the learning goal by describing a two-digit number in tens and ones with help.

Learning Targets

- Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases:
 - 10 can be thought of as a bundle of ten ones — called a “ten.”
 - The numbers from 11 to 19 are composed of a ten and one, two, three, four, five, six, seven, eight, or nine ones
 - The numbers 10, 20, 30, 40, 50, 60, 70, 80, 90 refer to one, two, three, four, five, six, seven, eight, or nine tens (and 0 ones)
- Compare two two-digit numbers based on meanings of the tens and ones digits, recording the results of comparisons with the symbols $>$, $=$, and $<$

Learning Design

Illustrative Mathematics Units 3 & 4

WGSD Curriculum – Math 1st Grade

Number Sense & Operations in Base Ten

High Priority Standards

1.NBT.B.5 Add within 100.

1.NBT.B.6 Calculate 10 more or 10 less than a given number mentally without having to count.

1.NBT.B.7 Add or subtract a multiple of 10 from another two-digit number, and justify the solution.

Learning Goal

Students will be able to use place value understanding and properties of operations to add and subtract.

Proficiency Scale

Innovating: Student demonstrates an in-depth inference or advanced application, or innovates with the learning goal.

Meeting: Student demonstrates mastery with the learning goal as evidenced by:

- Adding within 100, including adding a two-digit number to a one-digit number and adding a two-digit number and a multiple of 10, and explain the strategies and reasoning used.
- Subtracting multiples of 10 in the range of 10-90 and explain the strategies and reasoning used.
- Given a two-digit number, mentally finding 10 more or 10 less than the number.

Approaching: Student demonstrates they are nearing the learning goal by:

- Recognizing and recalling specific vocabulary, such as: two-digit, strategies.
- Performing processes such as:
 - Adding a two-digit number to a one-digit number using concrete models .
 - Subtracting multiples of 10 in the range of 10 to 90 using concrete models.

Beginning: Student demonstrates a limited understanding or skill with the learning goal by

- Finding 10 more or 10 less than a number using concrete models.
- Adding and subtracting multiples of 10 within 100, with help.

Learning Targets

- Add within 100, including adding a two-digit number and a one-digit number, and adding a two-digit number and a multiple of 10, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used. Understand that in adding two-digit numbers, one adds tens and tens, ones and ones; and sometimes it is necessary to compose a ten
- Given a two-digit number, mentally find 10 more or 10 less than the number, without having to count; explain the reasoning used
- Subtract multiples of 10 in the range 10-90 from multiples of 10 in the range 10-90 (positive or zero differences), using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used

WGSD Curriculum – Math 1st Grade

Geometry & Measurement

High Priority Standards

- 1.GM.A.1 Distinguish between defining attributes versus non-defining attributes; build and draw shapes that possess defining attributes.
- 1.GM.A.2 Compose and decompose two- and three-dimensional shapes to build an understanding of part-whole relationships and the properties of the original and composite shapes.
- 1.GM.A.3 Recognize two- and three-dimensional shapes from different perspectives and orientations.
- 1.GM.A.4 Partition circles and rectangles into two or four equal shares, and describe the shares and the wholes verbally.

Learning Goal

Students will be able to
reason with shapes and their
attributes.

Proficiency Scale

Innovating: Student demonstrates an in-depth inference or advanced application, or innovates with the learning goal.

Meeting: Student demonstrates mastery with the learning goal as evidenced by:

- Distinguishing between the defining and non-defining attributes of a variety of shapes (for example, defining attributes of triangles: closed, three-sided; non-defining attributes include color, orientation, and overall size).
- Creating two- and three-dimensional shapes.
- Describing the shares of partitioned circles and rectangles as halves, fourths, and quarters.
- Recognizing two- and three- dimensional shapes from different perspectives and orientations.

Approaching: Student demonstrates they are nearing the learning goal by:

- Recognizing and recalling specific vocabulary, such as: attribute, closed, color, shape, size, three sided, triangle, circle, cube, equal, fourth, half, half-circle, quarter, quarter-circle, rectangle, cone, cylinder, rectangular prism, shape, share, square, three dimensional, trapezoid, triangle, two dimensional.
- Performing processes such as:
 - Identifying the attributes of various shapes.
 - Identifying halves of circles and rectangles.
 - Partitioning circles and rectangles into two and four equal shares.
 - Creating two-dimensional shapes.

Beginning: Student demonstrates a limited understanding or skill with the learning goal by:

- Identifying attributes of shapes with help.
- Identifying halves of circles and rectangles with help.

WGSD Curriculum – Math 1st Grade

Learning Targets

- Distinguish between defining attributes (e.g., triangles are closed and three-sided) versus non-defining attributes (e.g., color, orientation, overall size); build and draw shapes to possess defining attributes
- Compose two-dimensional shapes (rectangles, squares, trapezoids, triangles, half-circles, and quarter-circles) or three-dimensional shapes (cubes, right rectangular prisms, right circular cones, and right circular cylinders) to create a composite shape, and compose new shapes from the composite shape. (Students do not need to learn formal names such as “right rectangular prism”.)
- Partition circles and rectangles into two and four equal shares, describe the shares using the words *halves*, *fourths*, and *quarters*, and use the phrases *half of*, *fourth of*, and *quarter of*. Describe the whole as two of, or four of the shares. Understand for these examples that decomposing into more equal shares creates smaller shares
