Introduction & Agenda

- Sign in
- Goals for meet up:
 - Reflect and share best practices as professional community
 - O Make sense of mathematics and key ideas so that you can make each lesson your own

Reflect on Current Module

SUCCESSES What has been successful? How do you plan to improve it?	CHALLENGES What has been challenging? How will you address or resolve it?
 Ex: Students were engaged when I launched the Concept Development with a key question. I want to incorporate more student input to keep students engaged during CD. Much better than module 1 They are starting to work on their own 	 Working on fitting more into my lessons. Time to get to all of the hands on activities prepping everything ahead of time (manipulatives) reporting progress to parents? keeping

in application problems	them updated
	grading

Preview Upcoming Module

- Expectations for this hour
 - Presenting to teachers
 - Focusing on mathematics
 - O Highlighting core/essentials of lessons: key concepts and problems
 - O Seeking to reduce prep burden
- Grade 2 Module 3 Notes

Announcements & Feedback

- Volunteer to host future meet ups: sign-up
- Provide feedback on today's meet up: <u>survey</u>

Happy Tens
