

H.E.R.O.E.S.

Helpful Enrichment Response Option Extending School

Welcome to the West Lauderdale Middle School H.E.R.O.E.S. for 7th grade math. In this strange and rare set of circumstances, we hope you will spend some quality time reviewing the skills that we have learned throughout our first 3 nine week periods. You may choose to work at your own pace by completing a little each day, by taking 2-3 days, or by working all in one sitting. Remember to use your workbook as a resource for reviewing skills or vocabulary.

Selected answers are posted at the end of some of the pages, so you may self check your work before submitting to your teacher. You may take a picture of your work and upload it to your teacher through email or google classroom.

Week 1 (April 1-10)

Review of Standards found in iReady chapters 1-8

7NS1: I can add, subtract, multiply, and divide with integers and other rational numbers including fractions and decimals.

Packet pages 3-13

Week 2 (April 11-17)

Review of Standards found in iReady chapters 9-13

7RP2: I can determine if relationships are proportional by working with graphs, tables, and equations.

I can identify the constant of proportionality (k) and locate it on a coordinate plane.

7RP3: I can use proportional relationships to solve real world mathematical problems using percents.

Packet pages 14-23
