

Halloween Cereal Spreadsheet

I get 3 boxes of Halloween cereal. No need to get family size. You can substitute with any cereal or candy pieces.

I use paper plates.

Students will need a pen or pencil to write their numbers on the plate. I prepare a plate for each student...I just pour a bit of each cereal on each plate. You can also put a little of each cereal in zip lock bags for each student.

Halloween Cereal Spreadsheet Activity Student instructions

Count your data...count how much of each cereal is on your plate. Count how many marshmallows. Write the number for each on your plate.

(Feel free to sketch-out your table on the plate.) **Create a 4 -column spreadsheet.**

Add a heading to your spreadsheet. Merge and center the heading to span across the top. Use the cereal name as a heading for each column and “marshmallows” as the fourth column.

Record your totals (data) for each column.

Use the sum function to total the items.

Color code each column as you see fit.

Insert a photo of your choice.

Insert a graph that you feel represents your data **best. Color code that** graph as you see fit.

Save as Halloween Cereal.

Merged and Centered a proper heading. /5	
Created a four-column spreadsheet with each column color-coded.	/5
Properly used the sum function.	/5
Inserted a photo	/5
Inserted a graph appropriate for the data	/5
TOTAL	/25
