

## Halloween Cereal Spreadsheet

**I get 3 boxes of Halloween cereal. No need to get family size. You can substitute with any cereal or candy pieces.**

**I use paper plates.**

**Students will need a pen or pencil to write their numbers on the plate. I prepare a plate for each student...I just pour a bit of each cereal on each plate. You can also put a little of each cereal in zip lock bags for each student.**

### Halloween Cereal Spreadsheet Activity Student instructions

**Count your data...**count how much of each cereal is on your plate. Count how many marshmallows. Write the number for each on your plate.

(Feel free to sketch-out your table on the plate.) **Create a 4 -column spreadsheet.**

Add a heading to your spreadsheet. Merge and center the heading to span across the top. Use the cereal name as a heading for each column and “marshmallows” as the fourth column.

**Record your totals (data)** for each column.

Use the sum function to total the items.

Color code each column as you see fit.

Insert a photo of your choice.

Insert a graph that you feel represents your data **best. Color code that** graph as you see fit.

Save as Halloween Cereal.

Merged and Centered a proper heading. /5	
Created a four-column spreadsheet with each column color-coded.	/5
Properly used the sum function.	/5
Inserted a photo	/5
Inserted a graph appropriate for the data	/5
TOTAL	/25
