

The Center of Excellence in Remote Sensing Education and Research at ECSU hosted their annual “Celebration of Women in Mathematics” on October 24, 2017. Young ladies had participated in a wide range of hands-on activities and math related workshops. Workshops included Ground Penetrating Radar, STEM Mobile, Rockets, Computer Science, Discovering Female Mathematicians, Remote Sensing, Mysteries of Flight, and Robotics as well as others. These are designed to expose girls to the applications of mathematics in their lives and challenge them to widen their perspectives on math and STEM.

We are very proud of our young ladies and their fantastic efforts in the Robotics area

Imani Roberts -- 1st place

Enaissa White and Destiny Gibson -- 2nd place

Jasmine Conran -- 3rd place
