

Holiday Postcard

Directions: Design a postcard for the holiday season to send to friends/family. Get your creative juices flowing and show me what you've learned so far! You may use an image from Google, but you should add other things to it. (AKA - DON'T JUST INSERT A PICTURE OF A POSTCARD AND BE DONE!) You can choose any holiday you'd like that takes place this time of year (even could be New Year's Eve themed)

Things that MUST be included:

- ★ Change the page background color
- ★ Insert a textbox with text somewhere
- ★ Insert a shape that fits in with the rest of your postcard (maybe use the shapes to make your design even!)
- ★ The page orientation should be set to landscape
- ★ The page margins should be set to "narrow"
- ★ Insert the date building block
