Postcard

Directions: Design a postcard to send to friends/family. Get your creative juices flowing and show me what you've learned so far! You may use an image from Google, but you should add other things to it. (AKA - DON'T JUST INSERT A PICTURE OF A POSTCARD AND BE DONE!) You can choose any holiday or destination you'd like! There are some Christmas/winter examples below

Things that MUST be included:
- ★ Change the <u>page background color</u>
- ★ Insert a <u>textbox</u> with text somewhere
- ★ Insert a <u>shape</u> that fits in with the rest of your postcard (maybe use the shapes to make your design even!)
- ★ The <u>page orientation</u> should be set to landscape
- ★ The <u>page margins</u> should be set to "narrow"
- ★ Insert the <u>date building block</u>

MAY YOUR DAYS BE
Merry and Bright

FROM THE OSWALDS

HAPPY HOLIDAYS!

Always grateful for your friendship

Once you have your postcard made, insert a new blank page. On this page, create two gift tags to go with your holiday! Use shapes to create the tag and insert text/pictures/color. Requirements:

- Use a shape for the tag outline (hint: use "edit points" after you've inserted a shape if you can't find one that fits your needs)
- Format and modify the shape so that it looks like a gift tag
- "Attach" a string to the end of your tag (hint: use the lines and edit the points as needed)
- Include color, images, text, etc. to make your tag appealing!
