

How to calculate grade point average.

First take your percentages and convert them to grade points using the HMJH Grading Scale Sheet

Then add the grade points

Finally divide by the number of classes.

This will give you your grade point average.

EXAMPLE:

95 3.8

87 3.4

83 3.0

98 4.0

79 2.4

100 4.0

20.6

$20.6/6 = 3.43$
