

How to make a Paper Clay Bowl

In a Press Mold

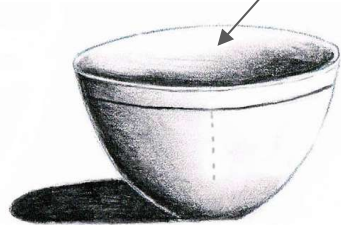

Supplies:

Getting Started

WORK ON THE INSIDE, concave area of bowl.

Continuing Bowl Construction

Finishing and Let to Dry

Setting the bowl outside in a sunny spot can help it dry.

Let it sit for at least 2 days, resisting the urge to touch it.

After it has dried for 2 days, then lift out by lifting the plastic wrap up.

Let it sit for more time so the outside of the bowl can now dry.

The newspaper made clay will darken slightly.

Add your Circular Design to the dried inside of the bowl.
