

WHAT INSPIRES YOU?

We are going to research and find ceramic artists that inspire us. I want you to find a minimum of 20 images that interest you. Look for a mixture of forms that interest you, and glaze techniques. Put them in a google doc or slides presentation.

After you have your images saved, organize them into groups that make sense to you. Are some very colorful? Are some functional?

Next to each image write notes down for yourself. You don't have to answer these specific questions for each picture, but here are a few to get you started.

Why do you like this piece of art?

What is something you could try this semester related to it?

What theme does this artwork explore?

How was it made?

Do you like the form of it?

What specifically do you like about the shape?

Do you like the way it is glazed?

What specifically about the way it is glazed do you like?

What are three words you could use to describe this artwork?

Below are some links from “This is Colossal” to articles of modern ceramic artists. This list is by no means exhaustive. You can search for artists on your own. Use can google, pinterest, instagram. etc...
