## IB MYP Unit Planning for Green Ninja Science

Green Ninja's approach closely aligns with the International Baccalaureate (IB) framework where students become active learners who engage with real-world problems through personal connections, empathy, and empowerment.

We are seeking to compensate IB Middle Years Programme (MYP) science educators for their assistance in integrating Green Ninja's Grade 6 units into MYP unit planners. The task involves adapting these units to the IB MYP unit planner format, which includes:

- identifying Key Concepts and Related Concepts
- selecting a Global Context
- crafting a Statement of Inquiry

Additionally, educators will identify explicit and implicit Approaches to Learning as well as Learner Profile Attributes. IB criterion will be attached to the units, ensuring each strand is assessed at least twice a year.

To guarantee a diverse range of Key Concepts, Related Concepts, and Global Contexts, biweekly virtual meetings (during weeks 1, 3, and 5) will be held to share progress updates, providing a collaborative environment. Participants will have a 5-week timeframe to complete the first unit, with the option to work on a second unit.

### How to Apply:

Please email your resume and cover letter to Amanda Tetrault at [amanda@greenninja.org](mailto:amanda@greenninja.org).
