

IDENTIFYING PATTERNS: ASSIGNMENT 1

A close-up photograph of a honeybee on a honeycomb structure. The bee is positioned in the center-left of the frame, facing right. Its body is covered in distinct black and yellow stripes. The honeycomb consists of numerous hexagonal cells, some of which are filled with a golden, translucent substance, likely honey. The lighting is bright, highlighting the texture of the bee's body and the surface of the honeycomb.

PATTERN PHOTO HUNT

- Using your phone (or a borrowed one) find five patterns from your surroundings and take photos of them. These can be any repeating pattern of shapes, colors, lines, and/or textures.
- Upload your photos into the Google drive and create a Google Slide document of your photos.
