

**ACTIVITY: IDEAL GAS processes.** Complete the table based on the videos of the experiments (see links).

EXPERIMEN T (NOTE: all experiments have <b>air</b> in the container)	List all physical quantities that are <b>constant</b> and write their values. Indicate any assumptions that you made.	Dependent variable	Independent variable	The mathematical relationship between the variables (Indep. vs dep.; use IGL)	Mass of air in the container (use IGL)	Graph $P(T)$ Label the states in order of appearance in the experiment (1,2,3..), qualitatively	Graph $P(V)$ Label the states in order of appearance in the experiment (1,2,3..), qualitatively	Graph $V(T)$ Label the states in order of appearance in the experiment (1,2,3..), qualitatively
