Academic core content credit may be earned by completing an approved career and technical education course. Approval to offer credit must be obtained through an application process with the Department of Education.

Students may be granted up to one credit in Fine Arts for participation in extracurricular activities. A maximum of $\frac{1}{4}$ credit may be granted for each extracurricular activity each school year. Documentation of the alignment of the activity with SD Department of Education-approved fine arts content standards must first be made.

The Board may waive one or more graduation requirement for senior students who transfer from another state, who have met the standards in the state, and who are unable to meet the graduation requirements set by the state board because of time and scheduling constraints but not due to course failure.

Any advanced endorsement earned must be listed on the high school transcript.

Students who are unable to meet the graduation requirements will not be permitted to participate in graduation exercises.

EARLY GRADUATION

Students who will meet the graduation requirements by the end of their first semester senior year or final semester of the junior year must submit a letter of application to the Principal not later than the end of the first semester of the junior year. This letter must be signed by the student's parents and have the approval of the guidance counselor, at least one classroom teacher and the Principal. The student may be graduated early at the discretion of the Board.

Notes:

Districts may choose to offer a stand-alone Health course or to integrate Health at any time during grades 6-12 to meet the Health requirement.

Courses may not be counted more than once to fulfill high school graduation requirements. A course may however count to meet both the base high school diploma and advanced endorsement(s) requirements. For example; Algebra I can meet both the high school diploma requirement and any or all of the advanced endorsement requirements.
