- Fix red eye
- Retouch spots and blemishes
- Reduce the noise to make the image appear sharper
- Warp an image by stretching, curling, or bending the shape
- Scale, rotate, or flip all or parts of the image
- Crop an area to change the focus
- Remove, add, or combine picture elements
- Add pre-made shapes
- Apply artistic filters that change the appearance
- Paint using various artistic brushes
- Change the scenery
- Adjust the angle
- Construct an image using different elements such as a background color, text, shapes, and selections from other photographs
