

Project name: James Rizzi Inspired Box Buildings

Grades: 5-8

2+ 45 minute classes

Materials:

Small cardboard box (size of shoe box or cereal box)

Poster Paint (or similar)

Paint brush

Paper

Markers

Scissors

Glue

Technology:

Watch short youtube video of James Rizzi's Happy House in Germany

<https://www.youtube.com/watch?v=Xlk7Oqcg9a8>

Steps:

1. After watching the video above, think about what images you would want to have on a building you design.
2. On scrap paper, sketch out some possible designs for your building.
3. Use paint to paint all sides of your building (box). Each side can be painted a different color(s) and or design.
4. On separate paper, use markers (I like colored sharpies) to create images/doors/windows inspired by James Rizzi and your own personality and likes to cut out and glue onto the sides of your building.
