

# Computer Use Agreement

## Purpose

Kennedy Middle School will serve as a CMS Pilot school for the take home of CMS issued Chromebooks, charging cords and protective cases. Students will be provided with a school owned computer for the sole purpose of completing school related assignments. Students are given a school owned computer so they can access their course work at home. Internet access is provided for free on any CMS campus or Charlotte Mecklenburg Library.

## Student and Parent Responsibilities

- Students must use the computer responsibly by only visiting school appropriate websites. A state of North Carolina filtering program is on each device; therefore, students will be blocked from various sites.
- Just as with CMS issued textbooks, students are asked to treat computers with care including:
  - Never leaving the computer in extreme temperatures.
  - Never allowing food or drink to be consumed near the computer.
  - Never attempting to repair a computer without consulting authorized school personnel.
  - Never transporting the computer without a protective case.
  - Never downloading unauthorized software onto the computer.
  - Repeated negative care for your Chromebook could result in having your take home privilege revoked.
- Parents are responsible for immediately filing a police report and notifying a school administrator if the computer is stolen while away from school.
- Student and Parent understand that only a CMS issued Gmail account can be used to access the Chromebook.
- The CMS issued Chromebook, charging cord and protective case will be returned prior to the end of the 2017-2018 school year.
- Repeated violations of take home CMS issued Chromebooks could result in loss of take home privilege. This includes but is not limited to; repeatedly forgetting Chromebook at home, repeated destruction or repeated loss of Chromebook and inappropriate technology usage.

## School Responsibilities

- Teachers will ensure that students understand how to properly care for their device.
- Teachers will inform students about acceptable use policies.
- The district will periodically and without warning monitor the historic activity on the computer.

I understand the above agreement and understand my responsibilities for the device that is assigned to me.
