Telehealth Services

The purpose of Telehealth Services is to provide care to your child in certain situations, such as when they become ill at school or during periods of school closure. By signing below, you are acknowledging that you understand the risk and benefits of your child receiving treatment through school-based health service and you give consent for us to treat your child, virtually by telehealth. Telehealth is the use of electronic information and communication technologies by a health care provider (using interactive audio, video, or data communications) to deliver services to your child when he/she is at school (or out of school) and the provider is located at a different place. Not every condition can be treated by telehealth. If your child's treatment provider believes your child would be better served by in person treatment you will be notified and referred to an in person setting for further care. If your child's condition is determined to be emergent, the school and/or the provider may send him/her to the hospital. Telehealth encounters are subject to the requirements of the HIPAA privacy rule that apply to protected health information (outlined in the release of information section). If you text or email us with patient information in an unsecured manner, you understand that the patient information could be viewed by someone other than us. There is a risk that treatment provided using telehealth could be disrupted due to technical failures.

For telehealth services occurring via MyChart, if your child is under the age of 12, you will maintain the primary account for your child. If your child is over the age of 12 (N.C. Gen. Stat. § 90-21.4), your child will maintain the primary account and you may receive proxy privileges to the account.
