If you have a family vacation planned during this time, please let your child's ELA, math or science teacher know; this will help us schedule as we aim to reach 100% completion rate.

The Smarter Balanced Assessment System will give parents and students more accurate and actionable information about what students are learning. Because these assessments are computer adaptive, <http://www.smarterbalanced.org/assessments/testing-technology/> they will also provide better information about the needs and successes of individual students. These next-generation assessments are aligned to the Montana State Standards in English language arts/literacy, mathematics and science for grades 3-8. Smarter Balanced will provide parents, students, and teachers a clearer window on whether students are on track to graduate high school, ready for college and the workplace. For more information on the SBAC testing process please visit this link: <http://www.smarterbalanced.org/about/>
