

Dear Kalispell Public Schools Community and Families,

The past few months have been challenging for schools across Flathead County as we navigated preparations for opening our schools amidst the COVID-19 pandemic. However, thanks to the support of our parents, students, faculty, staff, health officials and our community, the 2020-2021 school year is underway.

As the school year continues, the School Districts in Flathead County, the Flathead City-County Health Department and Kalispell Regional Healthcare have committed to an ongoing collaboration to continue addressing operational needs in our schools specific to COVID-19 and protect the health and safety of our students, faculty and staff. By working together, the COVID-19 School Advisory Council - made up of leaders from Flathead County school districts, parents of our students, public health officials from the Flathead City-County Health Department, and representatives from Kalispell Regional Healthcare - will continually evaluate any changes needed as this pandemic continues and address issues as they arise in a consistent manner.

The school districts will focus on the daily health and safety needs of the schools defined in their operational plans. The Flathead City-County health department will provide public health guidance and investigate all positive COVID-19 cases in Flathead County. Kalispell Regional Healthcare will help connect students to primary care, provide testing locations and other health resources, support school nurses and provide a 24-hour call center to answer questions about COVID-19.

This team has also collaborated on a variety of educational resources for parents, faculty and staff, which can be found online at krh.org/COVID-19. Most recently, in response to many questions from parents over this first week, new resources have been added:

[Contact Tracing](#) Steps in the process used to investigate positive cases, including quarantine requirements.

[COVID Testing Locations](#) What to do and where to go, should your son or daughter need to be tested for COVID-19.

[Community Collaboration](#) The roles and responsibilities of community partners in addressing the health and safety of students, faculty and staff at our schools.

We encourage you to review these and other resources to understand the steps all of us can take to have a safe and healthy school year. If you have questions related to COVID-19, please contact the 24-hour Call Center at Kalispell Regional Healthcare at (406) 890-7272.

Thank you again for your continued support,

The COVID-19 School Advisory Council:

Micah Hill, Superintendent, Kalispell

Dave Wick, Superintendent, Columbia Falls

Dave Means, Superintendent, Whitefish

Laurie Barron, Superintendent, Evergreen

Matt Jensen, Superintendent, Bigfork

Jeremy Marsh, Head of School, Stillwater Christian School
