

# Learn More About Your Brain!

Check out the **Disco Brain** video on the **Awesome Sauce** channel.

Read the facts about the different **lobes**, or sections, of the brain. Then, cut out and tape or glue each activity below the lobe that controls it.

## ? Facts:

- The **frontal lobe** controls problem-solving, feeling emotions, and movement.
- The **parietal lobe** controls the senses such as taste, temperature, touch, and pain.
- The **temporal lobe** helps with memory and hearing.
- The **occipital lobe** helps with vision.
