

## Lesson Plan: “Apple colour Sort”

### Materials

- White paper with 3 apples printed on it
- Coloured pasta (red, green, yellow)
- Crayons and markers
- Glue in cups with brushes
- Fully intact apples

### Instructions

(hand-over-hand assistance where needed)

1. Dye the pasta: pour your pasta into a container that has a tight-fitting lid. In a small bowl, mix a generous dollop of food colouring with a teaspoon of vinegar. Place the lid on (make sure it's tight!), and shake it
2. Give students a piece of paper with 3 apples on it. Students can colour the apples red, green and yellow.
3. Student can sort the pasta by colour on to the apples. Use glue to stick them on.
