## Linn-Mar Strength Program – Developing Better Athletes While Reducing Injuries

The LM Strength and Conditioning program has been evaluated this year by the Head Coaches of all sports and athletic administration. We have compared our program to those of similar sizes across the state and are now ready to begin Phase 1 of what we feel needs to be done to give our student athletes the same opportunities that other schools are providing their athletes.

We have identified 4 major points of concern with our current practices:

- 1) Our athletes experience gaps in programming as they move from being an “in-season” to an “out-of-season” athlete
- 2) Not all of our teams are following the same program philosophies which leads to inefficiency in our students overall experience
- 3) Our lower level programs at the high school do not have the avenues in line to get their athletes into a solid program throughout their Freshman and Sophomore years
- 4) Our female athletes are not participating in year around strength training programs as much as our male athletes are

The first phase of developing a better program for us is to have experts in the field come in and organize all of our programs, and students into one Linn-Mar Strength Program. We have researched many options and have identified Performance Therapies as the best option for us to work with to meet our goals. [www.ptforhealth.com](http://www.ptforhealth.com) This company is also able to write programs for our coaches to use down the road once our Linn-Mar teams start moving in the same direction and understand the movements.

Our first year plan is to have Performance Therapies manage all of our high school summer lifting programs, as well as a speed and agility school for our high school athletes. Performance therapies will work with us to also prepare our athletes of the future by offering a strength training opportunity for students entering into 7<sup>th</sup> and 8<sup>th</sup> grade as well as a speed and agility clinic for athletes in grades 5<sup>th</sup>-8<sup>th</sup> this summer. As we move into the 2017-2018 school year they will work with us to be here as we need them. We anticipate we will have them on campus both before and

after school to run our out of season athlete programs and also help implement our in season programs.
