

# Mandala

Student Name

## **HOS: Get Smart-Creative Thinker & Problem Solver**

**Learning Target:** I can explore and learn about Adobe Photoshop to **create 2 mandalas** using a previous photograph.

**Skill Learning Target:** I can duplicate, rotate, and move layers and choose blending modes and adjustment layers to create a dynamic mandala to transform my photograph into an authentic digital artwork.

# Criteria for Success

- After the demonstration, use the [tutorial](#) and watch the [Mandala Tutorial video](#) first to see the whole process. Please use headphones if you have them.
- Find a .JPG photo (can be unedited or edited already) you want to transform into a mandala and open into Adobe Photoshop. You will eventually make 2 different ones.
- Rewatch and pause as you edit and/or open up the attached Step by Step tutorial for directions.
- When you finish, save as a .PSD and .JPG.** The .PSD is so you can go back and make edits as needed. **SUBMIT THE .JPG** is since the .PSD will not be accepted by Google Slides since it is a large file format. **Back all files up in Google Drive portfolio.**
- When you finish you will need to show McGregor your PSD Mandalas to show me your layers/finished mandala and discuss any additional edits.
- Submit your original photographs and 2 mandala .JPGs to this assignment.
