

Family Circle Lesson March 2023

Core Values in our Passion Projects

Students explored how their core values are important in their passion projects! For example, some thought about ways perseverance is important in basketball & integrity is important in being a scientist. Then older students paired with younger students to help them find a digital resource on their topic from credible sources! We demonstrated our core values while doing this task! We are realizing so many ways that our core values are important to ourselves, our community, and our world.

Respect, Integrity, Kindness, Perseverance, Responsibility
