Origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands

☐ **White**
Origins in any of the original peoples of Europe, the Middle East, or North Africa

DUAL ENROLLMENT SPRING 2016

Massachusetts Maritime Academy

The Dual Enrollment program provides the opportunity for qualified high school students to take a transferable, introductory college course at no cost*! Grant funded through the Department of Higher Education, Massachusetts Maritime Dual Enrollment provides courses that focus on students interested in Science, Technology, Engineering and Math (STEM) fields.

2016 Dual Enrollment Course Offerings, Wednesdays 6-9pm on MMA campus:

****Classes begin on Wednesday, March 2, 2016****

Introduction to Emergency Management – (EM-2212) 3 credits

An introduction to the disciplines, authorities, and policies involved in the field of emergency management. Topics include: hazard analysis and underlying social and environmental processes, vulnerability analysis, hazard mitigation, emergency response and disaster recovery.

The Business of Shipping – (IM-2211) 3 credits

This is an introductory course that explores the organization and workings of the global shipping industry. The emphasis is on the commercial and economic factors involved and how they impact the decision making process. It examines the supply/demand equation for maritime transportation, shipping cycles, shipping markets, ship finance, operating costs, regulatory agencies and market projections. The course combines historical perspective with economic theory and practical analysis of industry performance and changes.

English Composition – (HU-1111) 3 credits

English Composition guides students in discovering and creating meaning through language and writing and provides further guidance as they generate ideas and organize structures for reflection, persuasion, analysis, and argument. The course provides opportunities to critically read and examine various texts, to explore and analyze different rhetorical strategies, to develop and support a controlling idea and/or thesis statement, to study the writing process, and to revise meaningfully and independently. It gives guidance in synthesizing and documenting information and offers suggestions for effective grammar, usage, punctuation, spelling, or other mechanics, as needed. The course asks students to collaborate with their classmates and instructor through team assignments, discussion, presentations, individual conferences and, when appropriate, peer review. By focusing first on fluency, then on clarity, then on correctness, the course gives students ample opportunity to develop and refine their writing skills for various audiences and purposes, both in and beyond college.

Please indicate your course selection by checking a box below:

- ☐ Introduction to Emergency Management
- ☐ The Business of Shipping
- ☐ English Composition

***Books for each course can be purchased through the Follett Book Store on the Massachusetts Maritime Academy campus. Financial assistance is available to students in need.**
