

Monday January 26, 2009

First, make a bar graph or column graph of the data from the density lab on Thursday and Friday of last week. Once you finish with your graph call me over to check it and then print it out. If you have time, start the homework assignment below. This will be due on Friday.

http://www.edinformatics.com/math_science/mass_volume_density.htm

Use the following website to learn more about mass, volume, and density and practice what you have learned.

Complete as many sections that you can today. For those you cannot complete in class, you will need to do them for homework. Write your answers in your Science notebook. (if you don't have a computer/internet at home, you will have to complete it here at school)

Sections:

1. Mass
2. Mass vs. weight
3. volume
4. density of solid
5. density of liquid
6. assessment
7. density challenge
