

<b>Essential Understandings</b>	<ul style="list-style-type: none"> <li>Understanding insurance and investments is important in the twenty-first century economy.</li> </ul>
<b>Essential Questions</b>	<ul style="list-style-type: none"> <li>What is the purpose of life, health and disability insurance?</li> <li>How does the bond market work?</li> <li>How does the stock market work?</li> <li>What is a mutual fund?</li> <li>How does the real estate market work?</li> <li>How does one prepare for retirement?</li> </ul>
<b>Essential Knowledge</b>	<ul style="list-style-type: none"> <li>Insurance is a way of protecting you from financial hardship.</li> <li>Bonds are a form of long term promissory notes.</li> <li>Stocks represent ownership in a company.</li> <li>Mutual funds allow investors to diversify risk with a single purchase.</li> <li>Real estate investments can produce income through rents and capital gains.</li> <li>Retirement income may come from various sources.</li> </ul>
<b>Vocabulary</b>	<ul style="list-style-type: none"> <li><u>Terms:</u> <ul style="list-style-type: none"> <li>life insurance, health insurance, disability insurance, bonds, interest, yields, cash value, stocks, dividends, mutual funds, load, commission, real estate, net income, retirement, pension, benefits</li> </ul> </li> </ul>
<b>Essential Skills</b>	<ul style="list-style-type: none"> <li>Numerical calculations with percents.</li> <li>Calculate the cost of health insurance.</li> <li>Calculate the costs of buying stocks and bonds.</li> <li>Calculate the costs and incomes of investment properties.</li> <li>Calculate retirement savings.</li> </ul>

<p><b>Related Maine Learning Results</b></p>	<p><u>Mathematics</u></p> <p>A. Number</p> <p>Real Number</p> <p>A1.Students know how to represent and use real numbers.</p> <ol style="list-style-type: none"> <li>Use the concept of nth root.</li> <li>Estimate the value(s) of roots and use technology to approximate them.</li> <li>Compute using laws of exponents.</li> <li>Multiply and divide numbers expressed in scientific notation.</li> <li>Understand that some equations do not have real solutions and that there exist other number systems to allow for solutions to these equations.</li> </ol> <p>B. Data</p> <p>Data Analysis</p> <p>B2.Students understand correlation and cause and effect.</p> <ol style="list-style-type: none"> <li>Recognize when correlation has been confused with cause and effect.</li> <li>Create and interpret scatter plots and estimate correlation and lines of best fit.</li> <li>Recognize positive and negative correlations based on data from a table or scatter plot.</li> <li>Estimate the strength of correlation based on a scatter plot.</li> </ol> <p>B3.Students understand and know how to describe distributions and find and use descriptive statistics for a set of data.</p> <ol style="list-style-type: none"> <li>Find and apply range, quartiles, mean absolute deviation, and standard deviation (using technology) of a set of data.</li> <li>Interpret, give examples of, and describe key differences among different types of distributions: uniform, normal, and skewed.</li> <li>For the same mean of normal distributions, use the standard deviation for a group of observations to establish 90%, 95%, or 99% confidence intervals.</li> </ol> <p>B4.Students understand that the purpose of random sampling is to reduce bias when creating a representative sample for a set of data.</p> <ol style="list-style-type: none"> <li>Describe and account for the difference between sample statistics and statistics describing the distribution of the entire population.</li> <li>Recognize that sample statistics produce estimates for the distribution of an entire population and recognize that larger sample sizes will produce more reliable estimates.</li> <li>Apply methods of creating random samples and recognize possible sources of bias in samples.</li> </ol>
