

To solve this mystery,  
you will need:

Set of flash cards

Number Line (optional)

# Math Mysteries

## Case of the Missing Differences

**Detective, your assignment is to solve the case of the missing differences  
by subtracting to find the missing differences.**

1. Place the stack of flash cards face-down on a table.
2. Set a timer or watch to record the time it takes to answer all cards.
3. Turn over each card and answer each problem.
4. If your answer is correct, place it in your pile. If you answer incorrectly, place it in a different pile.
5. When you have finished with all the cards, stop the timer.
6. Count up how many you answered correctly, and how many you answered incorrectly.
7. Try again later to beat your time!
