# Lesson 7

Objective: Compare two quantities, and identify the greater or lesser of the two given numerals.

### **Suggested Lesson Structure**

Total Time	(60 minutes)
Student Debrief	(10 minutes)
Concept Development	(29 minutes)
Application Problem	(5 minutes)
Fluency Practice	(16 minutes)

	1 More/Less,	10 More/Less	1.NBT.5	(6 minutes)
--	--------------	--------------	---------	-------------

Sprint: +1, -1, +10, -10 **1.NBT.5** (10 minutes)

# 1 More/Less, 10 More/Less (6 minutes)

Materials: (S) Personal math toolkit (4 ten-sticks, 4 dimes, and 10 pennies), personal white board, large place value chart (Fluency Template)

Note: This fluency activity provides practice with both proportional (linking cubes) and non-proportional (coins) representations of tens and ones. Students review the connection between place value and adding or subtracting ten or one.

- T: Show 20 cubes. Add 1. Say the addition sentence, starting with 20.
- S: 20 + 1 = 21.
- T: Add 10. Say the addition sentence, starting with 21.
- S: 21 + 10 = 31.
- T: Subtract 1. Say the subtraction sentence, starting with 31.
- S: 31 1 = 30.
- T: Show 39. Add 1. Say the addition sentence, starting with 39.
- S: 39 + 1 = 40.

Continue adding or subtracting 10 or 1, choosing different start numbers within 40, as appropriate. After three minutes, use coins instead of linking cubes. When using coins, be careful not to ask students to subtract 1 from a multiple of 10, as students have not yet learned to subtract by decomposing a dime into 10 pennies.

Compare two quantities, and identify the greater or lesser of the two given numerals.

#### Sprint: +1, -1, +10, -10 (10 minutes)

Materials: (S) +1, -1, +10, -10 Sprint

Note: This Sprint reviews the concepts taught in Lesson 5 and supports students' understanding of place value.

## **Application Problem (5 minutes)**

Benny has 4 dimes. Marcus has 4 pennies. Benny says, "We have the same amount of money!" Is he correct? Use drawings or words to explain your thinking.

Note: This problem enables a teacher to identify which students understand, or are beginning to understand, the importance of the value of a unit. Differentiating between the two types of coins and their values is the most essential understanding gained from this problem.

## **Concept Development (29 minutes)**

**NOTES ON** 

**MULTIPLE MEANS** 

**OF ENGAGEMENT:** 

Challenge advanced students with

more questions about the 4 pennies

and 4 dimes, such as the following:

together?

have than Marcus?

make 40 cents?

Do you know of any other

How much money do the boys have

How many more cents does Benny

combinations of coins that could

Lesson 7

Materials: (T) Enlarged dimes and pennies for display, large place value chart (Fluency Template) (S) Numeral cards 0-10 (Lesson 4 Fluency Template), dimes and pennies from personal math toolkit

Students gather in the meeting area with their materials.

- T: Look at the Application Problem. Which boy has the greater total value of money?
- S: Benny does!  $\rightarrow$  40 cents is more than 4 cents.
- T: (Write greater under the 4 dimes, and circle this side of the work.) Correct. The word greater means more. 40 is more than 4. 40 is greater than 4.
- T: How could you describe 4 (circle Marcus's pennies with a finger) compared to 40? 4 is...?
- S: Smaller than 40.  $\rightarrow$  Less than 40.  $\rightarrow$  Fewer than 40.
- T: Yes, we would say 4 is *less* than 40. Let's compare some more numbers. Let's find the greater number in each pair of numbers.

Write the following suggested sequence of number pairs one at a time:

- 5 and 12
- 39 and 21

Lesson 7:

Compare two quantities, and identify the greater or lesser of the two given numerals.

- 23 and 32
- 17 and 15
- 14 and 40
- 30 and 13
- 1 ten 9 ones and 2 tens 1 one
- 3 tens 1 one and 1 ten 3 ones

Note: 17 and 15 above is the first example in which the ones place must be considered to compare the numbers; it is discussed in the Debrief.

Use ten-sticks or quick ten drawings. Each time, ask students to explain how they know which number is greater. Encourage students to use the language of tens and ones as they compare the tens and the ones in each number.

#### NOTES ON MULTIPLE MEANS OF ENGAGEMENT:

Some students may have difficulty comparing numbers that have similar digits, such as 12 and 21, or numbers that sound similar, such as 14 and 40 or 13 and 30. Use linking cubes along with the place value chart so students can see the comparison with manipulatives.

Repeat the process, next finding the number that is less in each pair.

- T: (Display 28 and 38 in place value charts.) Which number is greater?
- S: 38.
- T: Look at the place value charts. Do you look at the tens place or the ones place to help you find the greater number? Turn and talk with a partner.
- S: There is an 8 in the ones place for both numbers.  $\rightarrow$  You look at the tens place first, though.
- T: (Point to each digit while explaining.) Yes, 3 tens is greater than 2 tens. 38 is greater than 28.
- T: (Display 29 and 32 in place value charts.) Which number is greater?
- S: 32.
- T: Look at the place value charts. 9 is a lot greater than either of the digits in 32. Does that mean 29 is greater than 32? Turn and talk to your partner.
- S: We still have to look at the tens place first. Tens are greater than ones.  $\rightarrow$  There are only 2 tens in 29, and there are 3 tens in 32. The tens place is where you have to look.
- T: (Point to each digit while explaining.) Yes, 3 tens is greater than 2 tens. Let's remember the *value* of the digits when comparing!

#### **Comparison with Cards Game**

Partner A and Partner B

- 1. Each partner turns over two cards.
- 2. Add the two numbers together and find the total.
- 3. Partner A says a sentence to compare the totals using the words greater than or equal to.
- 4. The partner with the greater total wins the cards. (If the totals are equal, leave the cards until the next round when one student does have a greater total.)
- 5. Repeat with Partner B making the comparison statement.

Compare two quantities, and identify the greater or lesser of the two given numerals.

After the first minute of play, change the rules so that the person with the total that is *less* wins the cards. Partners should use the words *less than* when comparing the cards during this round. Alternate between the two rules for four minutes. At the five-minute mark, change the rules so that if the totals are *equal*, the game is over. Have students save one pair of cards to compare with a partner during the Debrief using a place value chart.

# Problem Set (10 minutes)

Students should do their personal best to complete the Problem Set within the allotted 10 minutes. For some classes, it may be appropriate to modify the assignment by specifying which problems they work on first.

# **Student Debrief (10 minutes)**

**Lesson Objective:** Compare two quantities, and identify the greater or lesser of the two given numerals.

The Student Debrief is intended to invite reflection and active processing of the total lesson experience.

Invite students to review their solutions for the Problem Set. They should check work by comparing answers with a partner before going over answers as a class. Look for misconceptions or misunderstandings that can be addressed in the Debrief. Guide students in a conversation to debrief the Problem Set and process the lesson.

Any combination of the questions below may be used to lead the discussion.

- In Problem 3, did you look at the tens or ones to compare? Why?
- Look at your Problem Set with a partner, and find an example where you needed to look at the ones place to compare. Talk about why you must sometimes look the ones place to compare numbers.
- How are dimes and pennies similar to tens and ones?
- Look at Problem 4. Was this pair more difficult for you to compare? Why?

Lesson 7:

Compare two quantities, and identify the greater or lesser of the two given numerals.

- We call the numeral in the tens place a digit. The numeral in the ones place can also be called a digit. Look at the pair of numbers in Problem 5(d) and identify the digit in the tens place and the digit in the ones place for both numbers.
- Take out the cards you kept from today's Comparison with Cards game. What is the total of each pair of cards? Write your total in a place value chart on your personal white board and compare with your partner.
- Share your answer to today's Application Problem with a partner. Restate your answer using the words greater or less.

### Exit Ticket (3 minutes)

After the Student Debrief, instruct students to complete the Exit Ticket. A review of their work helps with assessing students' understanding of the concepts that were presented in today's lesson and planning more effectively for future lessons. The questions may be read aloud to the students.

Lesson 7:

Compare two quantities, and identify the greater or lesser of the two given numerals.

15	18 + 10 = 🗆	30	□ - 10 = 29	

Lesson 7:

Compare two quantities, and identify the greater or lesser of the two given numerals.

Name

For each pair, write the number of items in each set. Then, circle the set with the *greater* number of items.

1.	00000	2.	
3.		<ul> <li>4. 00 00 00</li> <li>00 00 00</li> </ul>	<del>0</del> 00 000000000000000000000000000000000

- 5. Circle the number that is greater in each pair.
  - a. 1 ten 2 ones 3 tens 2 ones
  - b. 2 tens 8 ones 3 tens 2 ones
  - c. 19 15
  - d. 31 26
- 6. Circle the set of coins that has a greater value.

Lesson 7:

Compare two quantities, and identify the greater or lesser of the two given numerals.

For each pair, write the number of items in each set. Circle the set with *fewer* items.

11. Circle the number that is *less* in each pair.

a.	2 tens 5 ones	1 ten 5 ones
b.	28 ones	3 tens 2 ones
c.	18	13
d.	31	26

12. Circle the set of coins that has *less* value.

1 dime 2 pennies

1 penny 2 dimes

13. Circle the amount that is *less*. Draw or write to show how you know.

Name

Date
------

1. Write the number of items in each set. Then, circle the set that is *greater* in number. Write a statement to compare the two sets.

Write the number of items in each set. Then, circle the set that is *less* in number.
 Say a statement to compare the two sets.

3. Circle the set of coins that has a greater value.

4. Circle the set of coins that has less value.

Lesson 7:

Compare two quantities, and identify the greater or lesser of the two given numerals.

Name

Write the number, and circle the set that is *greater* in each pair. Say a statement to compare the two sets.

Circle the number that is greater for each pair.

5. Write the value and circle the set of coins that has *greater* value.

Lesson 7:

Compare two quantities, and identify the greater or lesser of the two given numerals.

Write the number, and circle the set that is *less* in each pair. Say a statement to compare the two sets.

Circle the number that is *less* for each pair.

10. Write the value and circle the set of coins that has *less* value.

11. Katelyn and Johnny are playing comparison with cards. They have recorded the totals for each round. For each round, circle the total that won the cards, and write the statement. The first one is done for you.

ROUND 1: The total that is **greater** wins.

19 is greater than 16.

a. ROUND 2: The total that is less wins.

<u>Katelyn's Total</u>	Johnny's Total
27	24

b. ROUND 3: The total that is greater wins.

c. ROUND 4: The total that is less wins.

<u>Katelyn's Total</u>	<u>Johnny's Total</u>
29	26

d. If Katelyn's total is 39, and Johnny's total has 3 tens 9 ones, who would have a greater total? Draw a math drawing to explain how you know.

Compare two quantities, and identify the greater or lesser of the two given numerals.

tens	ones

large place value chart

Lesson 7:

Compare two quantities, and identify the greater or lesser of the two given numerals.
