

Minnesota Academic Standards in English Language Arts

2010 Adopted Version, effective November 29, 2011

Spreadsheet Version

Introduction

This spreadsheet version is designed to allow users to format the standards document in a way that meets their needs, such as

- sorting standards by strands,
- adding columns for connections to curriculum, instructional resources, activities and assessment, or
- copying lines from the standards and maintaining the connection between standards and benchmarks.

The pdf document on the Minn. Dept. of Education (MDE) website is the official version. Refer to the introduction of that document for information about the organization and use of the standards and benchmarks. The *Frequently Asked Questions* document at that site provides further information about the background and implementation of the standards.
