### Important Note Regarding Passcodes

There have been instances of “hacking” into mailboxes, so protect your mailbox with an appropriate passcode. DO NOT use simple passcodes like 1234; 1111; your extension number, or part of your phone number. Suggestions for passcodes are a favorite year; a building address; a zip code; or a pattern on the keypad.

### To Transfer a Caller Directly to a Voicemail Box

With a Caller on the line,
