

Breathitt County Schools Adds Three New Thomas SAF-T-LINER C2 School Buses to the Fleet

Breathitt County, KY – September 2024 – The Breathitt County School System is excited to announce the arrival of three brand new 2025 Thomas SAF-T-LINER C2 school buses, further enhancing the safety, comfort, and overall experience for our students. These buses, equipped with the latest technology and amenities, represent a significant investment in the future of our children's education and well-being.

The new Thomas C2 buses come with state-of-the-art camera systems, ensuring a secure environment for students throughout their journey. These systems provide comprehensive coverage inside the bus with high-definition audio and video. These buses also feature state of the art stop arm cameras that will enable the district to capture the license plates of stop arm passers.

In addition to the advanced camera systems, the buses are equipped with air conditioning, ensuring a comfortable ride for students during the warm months. The Bus Wise 360-degree perimeter view system is another key feature, providing drivers with a complete view of their surroundings, significantly enhancing safety by minimizing blind spots.

The buses also feature tinted windows, offering students privacy and protection from the sun's glare, making their rides more comfortable. Furthermore, each bus is equipped with an onboard intercom and radio system, ensuring that students are not only safe but also entertained during their commutes.

This investment in our school transportation system would not have been possible without the support and commitment of the Breathitt County Board of Education. Their dedication to providing the best for our students is evident in this significant purchase, and we extend our heartfelt thanks to them for their ongoing investment in the future of Breathitt County's children.

As we continue to strive for excellence in education, these new buses are a testament to our commitment to ensuring that every student in Breathitt County has access to safe, comfortable, and enjoyable transportation to and from school. We look forward to seeing the positive impact these new buses will have on our students' daily routines.
