

SCHOOLS ARE CLOSED LEARNING IS OPEN

We send our well wishes to educators, learners, and communities around the world as we learn and explore together.

NEW WAYS OF TEACHING AND LEARNING

These are unprecedented times. The National Geographic Society is committed to supporting learners around the world and the educators who reach them. We've curated resources to teach, connect, explore, and inspire that are free and easy to implement.

TEACH AND EXPLORE AT HOME

There are many engaging, creative, and fun ways to learn at home. We invite you to [explore collections](#) of activities that have been developed for educators, parents, and caregivers to implement with K-12 learners outside the classroom.

- [Learn at Home: Grades K-2](#)
- [Learn at Home: Grades 3-5](#)
- [Learn at Home: Grades 6-12](#)

CONNECT & INSPIRE

We believe in the power of fostering community and connection around the globe. Let's lean on each other during this time and share resources, provide encouragement, and ask questions.

Join the conversation at

@NatGeoEducation:

- Share a supportive message using the hashtag [#TeacherStrong](#).
- Share an idea, resource, or instructional tool that's working for you and your students with other educators [@NatGeoEducation](#).
- Ask questions about how others are engaging learners or how a particular activity worked for them.
