

"Ugh, this math is just so dull and tedious. Why do we have to go through this? It feels like an endless cycle of numbers and rules that just don't excite me at all. Can't we do something a little more interesting? This is just so... boring!"

"Seriously? This math problem is just gross! Why do we have to deal with these weird numbers and confusing formulas? It's so unfair! I can't believe we have to waste time on this when there are so many more interesting things to do!"

"Oh no! This math problem is making my head spin! What if I mess it up? What if I can't figure it out? I just want everything to be perfect, but this feels so overwhelming! I really need to get this right!"

"Ugh, why does everyone else seem to get this so easily? It's like they're all acing math while I'm stuck here trying to figure out these problems. I wish I could just understand this the way they do! Why can't I be as good at math as they are?"

"Oh no! This math problem just won't cooperate! I thought I understood it, but it's like trying to jump on a trampoline made of jelly! Come on, brain, we can do this! Let's find a way to make this fun again!"

**"Ugh! Why is this so complicated?!
This math problem is making me so
mad! I mean, who even came up
with these ridiculous equations?
It's like they're just trying to
make us lose our minds! Let's get
this sorted out already!"**

"Oh gosh, why is this so hard? I can't believe I don't understand this! What if everyone sees me struggle? It's so embarrassing! I just want to blend in and not draw attention to myself while I figure this out!"

"I just don't get it. No matter how much I try, these math problems always seem to slip away from me. It's really tough, and it makes me feel like I'll never understand it. Sometimes it feels like I'm just not good enough for this."

**"Oh no! What if I get this wrong?
This math problem is really stressing
me out! I can't handle the pressure!**

**What if everyone sees me
struggling? This is terrifying! I just
want to get it right and avoid any
mistakes!"**

"Math is like a secret code, and I definitely forgot the key! If only numbers came with a manual... or maybe a snack! I mean, can't we just solve problems with pizza slices instead? That I can handle!"
