

NewTech@Mann

Technology That Enables - Teaching That Engages - Culture That Empowers
A School-Within-A-School at J. L. Mann High School

Reimagine Education! NewTech@Mann is an exciting high school curriculum with a focus on project-based instruction. Students collaborate on meaningful projects that require critical thinking, problem-solving, creativity, and communication. They also determine the direction of the projects and complete an internship or a senior project before graduation. Opportunities are available to take Advanced Placement and Dual-Credit college courses. J. L. Mann High School elective courses, athletics, and extracurricular activities are also available to NewTech@Mann students.

What Makes NewTech@Mann Different

- Project-based learning – lessons are learned in the context of a project with real-world applications
- One-on-one technology – all students receive a laptop
- Student-centered culture – students are directly involved in determining how their day is structured

Classes Available Next Year

We are adding new classes every year! Some courses are combined in order to help students make stronger connections as they learn. Courses are available in the College-Prep, Honors, and Advanced Placement levels.
